**Subject:** Please Settle the Microsoft Case

It is in the publics best interest, the economies best interest, and the tech industry's best interest to put an end to this litigation and settle the case promptly.

This has never been a case brought on nor fought in the best interest of the consumer. It was brought on by the executives of Microsoft's competitors and has always been predominantly in their own personal/corporate best interests. Please let corporations and their executives battle out market share in their own arenas - not in the political or court system. Especially in such a fast growing and competitive arena such as the tech sector.

Thank you.  
C. Solomon
